

MUSKAN LALWANI

Software Developer | Frontend & Full Stack

Hyderabad, Telangana, India • +91 7989633465 • muskanlalwani155@gmail.com • linkedin.com/in/muskanlalwani-dev • github.com/muskanlalwani155-design

PROFESSIONAL SUMMARY

Detail-oriented Software Developer with practical experience engineering responsive Single-Page Applications (SPAs) with React.js, modern JavaScript (ES6+), and CSS frameworks, alongside solid backend architecture in Python, Node.js, Express.js, and RESTful APIs. Skilled in designing schema models for MongoDB Atlas, MySQL, and TiDB Cloud, implementing AST/security guardrails, and building robust client-facing interfaces. Experienced in unit testing with Postman, version control with Git/GitHub, and deploying production web systems on Vercel and Render.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3
Frontend: React.js, Bootstrap, Flexbox, CSS Grid, DOM Manipulation, Single-Page Applications (SPAs)
Backend & APIs: Node.js, Express.js, RESTful APIs, JSON Server, Axios, Asynchronous Programming
Databases & Cloud: MongoDB Atlas, MySQL, TiDB Cloud, Relational Schema Design
Tools & Libraries: Git, GitHub, VS Code, Postman, Streamlit, Pandas, Chart.js, Vercel, Render

KEY PROJECTS

AI-Powered Inventory & Analytics Dashboard Live Demo: Streamlit App GitHub Repository - Architected an interactive inventory assistant allowing users to query live databases using natural English, converting text to SQL via the Google Gemini API. - Enforced backend security validation to block destructive SQL operations (DROP, DELETE, UPDATE), restricting execution strictly to safe SELECT queries. - Integrated connection pooling with a remote TiDB Cloud (MySQL) cluster and used Pandas to aggregate inventory trends and generate real-time business insights.	Python, Streamlit, Gemini API, TiDB Cloud, Pandas
Smart Clinic Healthcare Portal Live Demo: vercel App GitHub Repository - Engineered a full-stack clinical management suite to streamline doctor appointment booking, patient registrations, and prescription records. - Designed secure RESTful API endpoints with Express and MongoDB Atlas, enforcing validation rules for real-time doctor slot availability. - Implemented role-based access control (RBAC) to ensure confidentiality of patient medical histories and clinical consult notes.	React.js, Node.js, Express.js, MongoDB Atlas, Vercel
Student Management CRUD Application Live Demo: Vercel App GitHub Repository - Engineered a full-stack single-page application (SPA) in React.js delivering complete Create, Read, Update, and Delete (CRUD) operations for student academic records. - Designed modular RESTful endpoints in Node.js and Express.js with client-side Axios error interceptors and schema validation. - Verified endpoint payloads using Postman and deployed the responsive frontend on Vercel with decoupled API services hosted on Render.	React.js, Node.js, Express.js, Axios, Bootstrap, Vercel

EDUCATION

Bachelor of Commerce in Computer Applications

Graduated: June 2025

Geetanjali Degree College, Osmania University — Hyderabad, India

CERTIFICATIONS & JOB SIMULATIONS

- **Deloitte Australia — Technology Consulting Job Simulation:** Cloud migration feasibility and technology evaluation.
- **Tata Consultancy Services (TCS) — Cybersecurity Analyst Job Simulation:** IAM security controls, risk analysis, and identity management.
